

1.What is python programming?

Python is one of the most popular programming languages. It's simple to use, future rich, and supported by many libraries and frame work. Its clean syntax makes it beginner-friendly. python was created by guido van Rossum in 1989.

2.What is the advantages of python programming language compare to other programming language?

- 1.Extensive support libraries
- 2.Open source and large active community base
3. easy to read, learn, and write
- 4.less code compared to other languages
- 5.Object-Oriented and Procedural programming language
- 6.Portable and interactive and cross platform

What are the features of python programming language?

1. Free and Open Source
2. Easy to code and understand
3. simple and readable syntax
4. Object-Oriented Language
5. GUI Programming Support
6. High-Level Language
7. Large Community Support
8. Easy to Debug
9. Python is a portable language
10. Python is an Interpreted language

What are the applications of python programming language?

- Web Development
- Data Science and Analytics
- Artificial Intelligence and Machine Learning
- Automation and Scripting
- Cyber security
